## C205

3 bed+study 3.1 bath

Indoor: 2,940 SF Outdoor: 400 SF Total: 3,340 SF

400 SF Covered Terrace

Stated dimensions are measured following BOMA standards to the exterior boundaries of the exterior valls and the centering of interior demising valls (without deductions for interior columns, shear walls or shafts) and in fact vary from the dimensions that vould be determined by using the description and definition of the "Unit" set forth in the Declaration (which generally only includes the interior airspace between the perimeter walls and excludes interior structural components, shear walls and shafts). For the calculation of the unit are following the definition of the unit set forth in the Declaration, see Exhibit 73 of the Declaration Additionally, measurements of roces of forth or any floor plane are generally taken at it greates points of each giver norm (as if the room were a perfect rectangle), without regard for any cultouts. Accordingly, the area of the actual room will syrically be smaller than the product obtained by multipliving the stated inerthit times with All dimensions are approximate, and all floor planes and development planes are subject to change as the control of the product obtained by multipliving the set subject to change and the product obtained by multipliving the set subject to change and the product obtained by multipliving the set subject to change and the product obtained by multipliving the set subject to change and the product obtained the subject to change and the product obtained the subject to change and the product obtained and development planes are subject to change and the product obtained the subject to change and the product obtained and development planes are subject to change and the product obtained the subject to change and the product obtained the subject to change and the product ob
